## Church Celebrates Anniversary

### HISTORY OF COMMUNITY CHURCH IS RECALLED ON ANNIVERSARY

By BEATRICE LA FORCE

The Alpine Community Church was organized 65 years ago next Tuesday by a small group of local people meeting in the first parsonage, a house still standing on the corner of Tavern Road and Arnold Way. Percy Foss, whose mother, Mrs. Carolyn Athern Foss, was among those attending that meeting on February 24th, 1894, says, "Our church began about ten years before that with a Sunday School which we held in the school house for all wishing to attend. Since the greatest number were Episcopalians we all learned the catechism."

### Students Will Hear GA Metal Scientist

Dr. Massoud T. Simnad, chairman of the Metallurgy Department of General Atomic, will describe "Research on Materials for Nuclear Reactors" when he talks to high school science students in Crawford High School, 4191 55th, on Thursday, Feb. 26. The meeting is scheduled for 4 p. m.

It will be the third in the spring semester "Meet The Scientist Series," co-sponsored by the Theatre and Arts Foundation of San Diego County, General Atomic, Convair, Convair Astronautics, and the Scripps Institution of Oceanography.

The discussion will cover experimental methods used to study material, with an explanation of the properties that are of interest and  
Continued on Page 4

### Anniversary Dinner At Fuller Hall Tonite

The 65th Anniversary of the Alpine Community Church will be celebrated at a dinner at Fuller Hall, Friday, February 20, at 7 p. m. Mr. Clarence Stearns will be toastmaster of the affair with Rev. Curtis Claire, minister of the Lake Murray Manor Congregational Church, as speaker. All members who have been in the church 20 years or more will be seated at the speaker's table.

The Ladies' Guild of the church will prepare the meat dish, birthday cake and ice cream, and those attending are asked to bring a vegetable or salad and their own table service.

Everyone is invited to join in the observance of the founding of this beautiful church.

The first minister of the newly organized church was Rev. John Rogers, also first to live in the parsonage, built for that purpose by Mr. Benjamin Arnold, but never owned by the church.

Money was soon raised by the new congregation to buy a pretty little reed organ which remained in the service of the church for many years with Miss Pearl Foss as organist.

Though their church operated as a Mission project under the Southern California Congregational Conference, its members, from the first dreamed of being self-supporting and of having their own chapel. But for many years this could be only a dream. Ministers were supplied by the Conference, and services held in the school until the Town Hall was built in 1899. The church then moved there.

Following Rev. Rogers, who stayed five years; Rev. John Pearson preached from 1898 until 1902. He is remembered as a colorful character, a former missionary to China who had a queue, and sometimes wore Chinese clothes. For six years after he left, the church was without a regular Minister, being supplied with interim preachers from San Diego vicinity.

In 1906 two pastors were engaged to preach on alternate Sundays; Rev. M. Wilson, and a Rev. Clark, whose first name and initials have been lost. They say he picked his teeth with his pocket-knife.

In 1911 Alpine was included in a circuit with Dehesa, Jamul and Japatul, served by Rev. Wm. Conrad, who was paid by the Board of

### Highway Commission To Discuss Freeway Development Of Route 67

The State Division of Highways has set Wednesday, March 18, 1959, as the public meeting date for discussing freeway development of state sign route 67 between U. S. 80 in the City of El Cajon and the San Diego River, north of Lakeside, according to Jacob Dekema, district engineer for the division. The Santee Elementary School auditorium on Mission Gorge Road and Second Street in Santee has been reserved for the meeting, with 7:30 p. m. scheduled as the assembly time.

Development of the route to full visions for four lanes initially with freeway standards will include pro-sufficient rights of way to be acquired to permit six lane development when such is warranted. Frontage roads and bridges will be provided as necessary to bring this section up to modern highway safety standards, Dekema said.

Dekema and his staff will use maps and charts to explain the results of the highway studies on the proposal, and then will invite individual expression on the subject. A complete report of the meeting will be made for submission to the California Highway Commission. Dekema emphasized that the meeting is open to the public and that he wanted the report to reflect the thinking and the views of the people of the area in order that the best possible decision could be made by the Commission after a thorough study of the report.

### Sweetheart Ball Is Successful For Local March Of Dimes

Approximately 110 people attended the Sweetheart Ball at the school auditorium Saturday night according to Mrs. Renee Adams, local March of Dimes chairman.

All of the proceeds have not been counted, but Mrs. Adams estimated that the Alpine Ramblers had raised about \$280 in donations and ticket sales for the dance. The Tri-Hi-Y Club turned over \$97 in donations.

### Area Rainfall Now At Six Inches

A total rainfall of six inches has fallen during the winter season to the present time. The official precipitation report for Monday and Tuesday of this week was 1.60 inches. The first rainfall of the winter season was .30 which fell on September 23, 1958.

At this time last year total rainfall was 13.47 inches, over twice the accumulation for this year. The total rainfall through April 12, 1958 which ended the rainy season was 30.33 inches.

In 1957, 8.73 inches had fallen up to this date. The last rain of 1957 was on June 10 which resulted in a seasonal total of 14.84.

In 1956 the last rain fell on May 9 to produce a total of 12.21 inches.

In 1955 the rainy season ended on April 26 with a total of 10.86 inches.

### Water Authority To Discuss New District

Representatives of the San Diego County Water Authority who attended a meeting of the Metropolitan Water District in Los Angeles on February 13 report that most of the discussion involved Governor Brown's proposal for increasing Southern California's water supply.

There was no discussion at this meeting of the proposed water district for this area.

At a meeting to be held Thursday of this week the first item on the agenda was to be a discussion concerning the formation of an East San Diego County Water District and the fixation of boundaries for the proposed district.

### YOUR INCOME TAX YOUR BUSINESS INCOME, EXPENSES

Business or professional income and expense are reported on a separate form Schedule C, "Schedule of Profit (or Loss) From Business or Profession."

Nonbusiness deductions—if itemized—should be listed on page 2 of the Form 1040 tax return.

When a businessman files his first income tax return after he has begun business operation, he may

Partly cloudy; little change in temperature.  
No immediate threat of rain.

### A LETTER FROM ABROAD

From Barbara Latham LaForce Madrid, Spain

#### SPANISH FOOD

"Food in Spain can best be described as being rich. Olive oil plays a major role in cooking. It is even used to flavor peas. Each region in Spain seems to have a specialty. It is easy to recognize from what province or city a delicacy comes from as its origin is often put somewhere in the title, A la Segovia, etc.

"Spanish and Mexican food have nothing in common. Order a tortilla here and you'll get an omelette with fried potatoes or vegetables, or mushrooms cooked in it. And hot peppers are only used in subtle spicing.

"Probably the best way to show you what Spanish food is like is to give you some recipes. You might try them. My only advice is practice a while before you try them on guests and don't substitute salad oil for the olive oil . . . for flavor's sake. As to measuring and amounts, the Spanish and Chinese cooks have a lot in common—the thumb, eye and instinct are the rule. So you will have to use your own tastes and experience for much of these. Remember, I warned you. Spanish food is RICH.

#### Sopas de Ajo a la Malaguena (Garlic Soup a la Malaguena)

For two servings: Brown two heads of garlic in some olive oil in a soup pot. When brown add: a skinned tomato, some diced ham, about a half a cup of very fine bread crumbs; some salt, a dash of chili powder. Stir all this around a bit and then add two or three cups of water. Simmer about 15 minutes. The soup should be creamy.

#### MERLUZA AL HORNO (Hake or Cod Baked)

Clean, bone and slice fish into steaks. Salt and bathe in lemon juice. Sprinkle some white wine  
Continued on Page 2

The school auditorium was beautifully decorated in the Valentine theme by members of Gamma Gamma Chapter of Epsilon Sigma Alpha Sorority, sponsors of the local March of Dimes campaign, and by the Alpine Ramblers.

The Sweetheart Ball Princess, Sharon Chynoweth, was crowned by Jerry Lynn Rorie, a past Princess; and her flowers were presented by her sister, LaVern Chynoweth, also a past Princess. Little Vic Cooper acted as crown bearer.

### Convair Publishes Space Booklet

SAN DIEGO, Calif.—A 72-page booklet on astronautics, called the Space Primer, has been published by Convair (Astronautics) Division of General Dynamics Corporation, builder of the Atlas intercontinental ballistic missile.

The booklet, prepared by the Astronautics staff, offers clear explanations of such subjects as rocket propulsion, the motion of satellites, and ways in which man can reach the moon and planet.

The publication contains a glossary of rocket and space terms a list of books and magazines on space, and a section on preparing for a career in astronautics.

Single copies may be obtained by writing Convair-Astronautics Dept. 120, P. O. Box 1128, San Diego, Calif. Bulk quantities are available at a nominal charge.

### Billions For Science

The National Science Foundation expects the federal government to spend about \$4,800,000,000 on scientific research and development in the current fiscal year.

### Realtors Report Property Sales

Bill Brown, of Alpine Branch La Mesa Realty Company reports the sale of 100 acres of land south of South Grade Road to Auren M. Pierce of the Pierce Realty Company, El Cajon. The owner, William F. Cain, is with the United States Army stationed in Germany. Mr. Pierce recently purchased 600 acres in the same vicinity for future development.

Mrs. Bill Brown reports the sale of the Alpine Apartments Motel, 2605 Highway 80, owned by Mr. and Mrs. Sidney K. Starr of Pine Valley. The new owners, Mr. and Mrs. Edwin Schwenck of Kansas City, Kansas, plan to return to Alpine soon and further improve the property with a very modern motel.

elect to report his income either on a cash or accrual basis.

Cash basis means income is taxable only when it is received and expenses are not deductible until paid. Accrual basis means income is taxable in the year it is earned, even if uncollected, and expenses are deductible in the year incurred, even if unpaid.

Once an accounting system has been chosen, it may not be changed without the permission of the Commissioner of Internal Revenue.

Income: Occasionally a businessman may accept a note, merchandise, or services in payment of a bill. These are includable in his income at fair market value.

Gifts that are given to a businessman in gratitude or recognition for

### Editorial

A movement called "Operation Fitness, U.S.A." is now underway. The object of this program is to overcome the flabbiness of modern youth brought on by the advent of current developments such as TV, movies, the automobile and other vocational activities that encourage spectator aspects rather than actual participation in athletic events.

This new project has been launched by the National Education Association in an effort to raise the health and fitness level of the children of the nation. Standards will be established for a group of examinations to test children from the fifth to twelfth grades in various exercises as swimming, sit-ups, push-ups, broadjump and 50-yard dash. The tests will determine a nationwide level as a goal for individual physical fitness.

A survey has indicated that American youth are less fit physically than European youngsters of equal age. The physical fitness program developed after a study by President Eisenhower's Citizen's Advisory Committee on Youth Fitness.

A few years ago youngsters in this same age group were developing their athletic abilities in competitive activities performed on the nation's vacant lots, but this facility is rapidly disappearing from the American scene.

### SOCIAL SECURITY QUESTIONS AND ANSWERS

#### QUESTION

My husband is age 60 and I am 58. He is bedfast and we are almost sure that he will never work again. Our son is age 21, but has been disabled severely since birth. Can we receive any social security?

#### ANSWER

If your husband has worked under Social Security for at least five out of the ten years before he became disabled, he should apply immediately for disability payments. Cash benefits also be paid to your adult, disabled son. If your son is in your care, that is, if he requires your constant attention for his daily needs, you too should claim benefits.

#### QUESTION

In 1958 I had an actual profit of \$700.00 from my farm. My gross sales were \$1,500. Must I pay social security tax on the actual profit of \$700.00 or can I use the optional method of reporting?

#### ANSWER

You can pay tax on your actual profit of \$700.00 or you can pay tax on two-thirds of \$1,500.00 under the optional method of reporting. The choice is entirely up to the individual farmer. It may be to your advantage to report on the larger amount.

#### QUESTION

Is it really necessary to keep records of my income and expenses on my farm?

#### ANSWER

Yes. Accurate farm records listing all income and expenses should be maintained in order for you to be able to file an accurate and complete tax return each year. If you do not have accurate records you may fail to receive social security credits for the work you have done.

#### QUESTION

If my cleaning lady is over retirement age and is receiving social security benefits do I have to pay this tax?

#### ANSWER

Yes. Regardless of a person's age social security tax must be paid as long as they are working and receiving wages of at least \$50.00 cash or more as a household worker.

#### QUESTION

Where do I obtain the report forms needed for filing quarterly returns for household workers?

#### ANSWER

Write to the social security office for free pamphlet entitled, "Do You Have a Maid," OASI 21. This

## SCIENCE

### Universe May Be "Blacking Out"

An astronomer said last week that the universe is blacking out. Countless billions of years hence no star will shine in the skies. The sun will be a shrunken dead mass weighing 15 tons to cubic inch. The earth long since will have become a frozen cinder.

This forecast was made in "Scientific American" by Dr. Jesse L. Greenstein, an astronomer at Mount Wilson and Palomar observatories. "All stars eventually fade to extinction," he said, "and so the sun will fade."

Stars are bound to die, Greenstein said, because the hydrogen fuel for their thermonuclear fires is bound to run out.

Astronomers have detected hundreds of dying stars which once blazed as vigorously as the sun.

The earth will burn to a crisp. Some seven billion years later as its death throes drag on, the sun will become a "white dwarf" and the temperature on earth will be 300 degrees below zero Fahrenheit.

### Latest Fishing Gear

The latest thing in gear for the herring fisherman is a 1,200-foot length of plastic pipe with holes at one-foot intervals and aircompressors at each end. Developed by U. S. Bureau of Commercial Fisheries researchers, the device produces a curtain of air bubbles that corrals schools of normally elusive herring into waiting nets. Maine fishermen recently employed the system to net 5,350 bushels of herring in six nights in waters that had yielded no fish at all for several weeks. Another modern wrinkle in fishing tactics was the concomitant use of aerial observations to locate the herring schools.

### Biological Forecast

A bit of potato sealed under constant conditions of temperature, pressure, and light in a specially designed respirometer can forecast barometric changes two days in ad-

vance, according to Frank A. Brown, Jr., Morrison Professor of Biological Sciences, Northwestern University.

All living things tested so far, in fact—from carrots and seaweed to crabs and rats—have demonstrated similar capacities. It is Brown's thesis that all forms of life have access to a still unidentified rhythmic external physical force, even when wholly removed from environmental changes. It is this force, he believes, that determines periodicity of solar, lunar, and annual rhythms, which in turn affect all living things.

All hermetically sealed organisms tested showed metabolic changes that correlated significantly with fluctuations in barometric pressure, cosmic radiation, background radiation, and outside temperature. Metabolic cycles were followed over long periods by means of automatic recording devices.

Data obtained from these and other studies at Northwestern and at the Marine Biological Laboratory, Woods Hole, Mass., led to the hypothesis that biologic cycles depend on a pervasive external factor of unknown nature. This view clashes with the more conventional concept that such rhythms are dictated by fully autonomous, internal "biologic clocks."

Once the nature of the timing mechanism and the external force is better understood, Brown hopes to have some clues to the physiologic basis of the long suspected relationship between meteorologic conditions and human behavior.

over each piece. Place in a well oiled pan. Lay over them a mixture of tomato paste and tomato slices. Next a layer of bread cubes fried in oil and some chopped garlic and parsley. Dot with butter and bake for 15 minutes. Mushrooms add a special flavor if you wish to add some.

### PAELLA A LA VALENCIANA

An extremely rich dish . . . lots of oil is used. There are many ways of preparing rice a la Valenciana, but this recipe is authentic and it is the way it is made in this province in Spain:

Clean and cut a tender chicken into 6 or 8 pieces. Clean and prepare some fresh peas, hearts of artichokes, green beans, about a dozen snails, clams and eel. "I have a hunch that your shelves are barren of the last three items. Don't hesitate to substitute browned diced veal, baby shrimps or hunks of tuna, etc.)

Using the usual rice/water proportions for steaming (about a cup and a half of rice for four people), put the rice and about half a cup olive oil and some crushed garlic to soak while you brown the chicken (and veal, etc., if you substitute).

When chicken is brown, add the rice mixture, the vegetables and other meats. Add some salt, pepper, half a bay leaf and saffron (a little goes a very long way), and the usual proportion of water. Steam until meat is done and rice is flaky and dry. How rich it is! But this unusual concoction is delicious and each mouthful is surprising and different.

For paella, the way you like it, don't hesitate to play around with the ingredients, amount of oil, spices, etc. The Spaniards do and it always seems to turn out well."

## Your Income Tax

Continued from Page 1

services which he has rendered are actually income to him and should be reported.

**Expenses:** Here is a checklist of most of the usual expenses incurred. The extent that these are ordinary and necessary in conducting a business, they are deductible on separate Schedule C, Form 1040.

**Accounting—Fees** paid for installing and maintaining an accounting system, bookkeeping, auditing, and preparation of tax returns.

**Automobile** — Automobile expenses incurred in making professional calls. No deduction is allowable for expenses while commuting between home and office.

**Bad Debts**—If previously included in income.

**Bank Charges**—Service charges for professional checking account.

**Casualty losses**—loss by fire, flood, theft, etc., of property used in professional practice, if not compensated by insurance.

**Collection fees**—Fees paid to collection agencies or attorneys.

**Conventions**—Costs incurred in attending conventions directly related to a business. This does not include wife's expenses.

**Damages** — Payment of damage claims or judgments, including litigation expenses, arising out of business activities.

**Depreciation**—Annual allowance to recover cost of business property having a useful life of more than one year.

## CLUB Activities

An Association Meeting of the Congregational Christian Women was held at Lemon Grove on Tuesday, February 17th. The meeting was attended by Mesdames Sally Nixon, Gladys Wotring, Beulah Ford, Emily Manly, Eve Coppock, Fern Latham and Miss Amanda Bower.

★ ★ ★

Members of the Alpine Women's Club will present its annual spring fashion show, sponsored by Martha's Apparel Shop of El Cajon and San Diego, Tuesday, February 24th, at the Club House.

The show will be preceded by a potluck luncheon at 12:30. Admission is \$1. Guests of members are invited. Reservations may be made by calling Mrs. George Fordney, HI 5-2831, or Mrs. A. J. Dittmar, HI 5-3355.

The newest spring styles will be modeled by "The Fashion Dolls," members of the Club, Mmes. T. L. Judd, Milton Cooper, T. L. Nichols, Carl McCall, H. A. Cesario, A. B. Everson, Charles Bradley, and Miss Noreen Fordney.

Mrs. George Fordney has been named chairman, assisted by Mrs. Ben Cerveny and Mrs. A. J. Dittmar. Mrs. Milton Cooper will be acting hostess with Mrs. Mike Liebert in charge of decorations. Mrs. T. A. Smith will preside.

★ ★ ★

Members of Alpine Tri-Hi-Y held a meeting on Wednesday, February 11th, at the home of Leone Dyer. Boxes will be in Alpine stores by February 25th for donations of toys to the San Diego Children's Home. A money-making idea of the club is selling Kathryn Beich vacuum-packed candles.

The group will see "Gigi" on February 23rd. Next meeting the girls will hold a Hobo Party to which guests have been invited.

The guest speaker was Mrs. La Force who spoke on the history of Alpine. The meeting was adjourned and refreshments were served.

pamphlet has a tear-off which may be mailed to the District Director of Internal Revenue who will send you the necessary form each quarter. If you prefer, you may write direct to the District of Internal Revenue.

### QUESTION

I operate a small beauty shop in my home and I am the only operator. Can I pay social security tax on my earnings of \$950.00, and if so, how do I pay the tax?

### ANSWER

If you are self-employed and your net earnings are \$400.00 or more in a year, you must report your earnings and pay your social security self-employment tax each year. Your social security tax is figured by using Schedule C to determine your net earnings. Schedule C is part of the income tax form which must be filed with the District Director of Internal Revenue by April 15th of each year.

### Church History

Continued from Page 1

Home Missions who also supplied him with a Model T Ford for transportation. During this time the congregation was often very small. Mr. Foss remembers when only three people attended.

Rev. Arthur Peebles, in 1915, inherited the circuit and the Model T, continuing the work for the next five years.

The church had a bad time during the 1920s. Membership dropped to seven, but these managed to purchase a parsonage. Still they had no regular Minister again until 1929. In 1928 they had re-organized and formally named themselves the ALPINE COMMUNITY CHURCH.

Rev. Wm. Fuller, remembered well and with affection by many present day members, became pastor in 1929. He was assistant pastor of Plymouth Church, in San Diego, and is remembered as a devout and sincere man. Under his leadership the church grew. Land was bought on Victoria Drive for a church site, with money from the sale of the parsonage.

The first chapel, called the LITTLE BROWN CHURCH IN THE HILLS, was built there in 1933 on the site now occupied by the present church, and dedicated that year on October 29 with a debt of less than \$100. Most of the work was done by volunteer labor. The bell, now in the tower of the present church, was installed in that of the first chapel as a gift from the Alpin Woman's club. This club had since purchased the old Town Hall, and removed its tower where the bell had first hung, and was used to call the people to Town Meeting, and to ring for church as well.

Rev. Fuller served the church for 10 years. As Percy Foss remembers, "He stayed longer by several years, than any of the others. It was also his longest pastorate. I was glad when they named Fuller Hall for him."

Dr. Wm. I. Jones was the next pastor, coming in October 1940. He was a scholar, and his fine preaching promoted the growth of the church. During his administration, the parsonage fund was started.

From the First Congregational Church in Phoenix, Arizona, came the next pastor, Rev. Fred Line. During his term the membership

passed 100 for the first time. The parsonage was built and completed without debt. In this work, Mrs. James Dunn must receive much credit, for it was she who worked tirelessly to raise much of the money for this project. The parsonage was later dedicated to Reverend Line when he died.

Dr. Roger Larson, present minister of the church, came in September 1948. His first two years were used in part to complete his doctorate, and in 1950 he received the degree of Doctor of Philosophy, from the University of California. He then set to work to lead the church toward new objectives. The first of these was the building of a new church.

A \$30,000.00 structure was at first proposed, and later raised to \$50,000. It was decided to move the first chapel back to make room for the new one on the original site. The necessary land behind the property was acquired and in 1952 the old chapel was moved back, to be used as a social hall, and was later dedicated to the memory of Rev. Fuller.

Work on the new church was begun at once, with a part of the labor and some materials donated. In one year it was finished, a beautiful little cathedral. To quote from Dr. Larson's inspiring dedication sermon, "THE RELIGIOUS MEANING OF OUR NEW CHURCH," "This church is a creation; it is a copy of no other church. . . . We have used the arts freely as is evidenced in our altar, reredos, and pulpit carvings. Every piece of art in this church is symbolic of something greater than itself. . . . Everything in the building either has work to do, or has a part in preaching the gospel."

Most of the special features,

the techniques for meeting design requirements. He also will explain the development and fabrication techniques for some reactors' fuel elements. He will illustrate the talk with actual fuel elements and with models.

Dr. Simnad is an expert in the scientific study of corrosion processes. He received his Ph. D. in physical chemistry from Cambridge University, England, in 1945. He continued his research there until 1948, when he joined the Metals Research Laboratory of Carnegie Institute of Technology, where he remained until joining General Atomic in 1956. His principal research concerns the effects of nuclear radiations on surface reactions of metals, the structure of liquid metal oxides and the nucleation of metals from atomic beams.

many utilitarian ones, such as doors, light fixtures, pews, and all of the art work, were donated as memorials or outright gifts, by members and friends of the church. As with the first chapel, this one was made possible by the loving, unselfish interest of many sincere people.

Now ALPINE COMMUNITY CHURCH is free of debt and self-supporting, and possessing its own home, the long dream of its founders realized at last, in a beautiful little cathedral, with a loyal congregation, led by a dedicated Minister. To quote from Dr. Larson's sermon once more, "The tower rises upward as a finger pointing to God, and exalting the cross above all else."

The United States has contributed three million dollars to the world malaria fund of the World Health Organizations.

### TEEN TALK

By JANIE

Friday the 13th turned out to be a lucky day. The Japatul 4-H Club gave an old-fashioned box social Friday night for members of the Alpine Champions, Alpine Cloverettes and the Descanso 4-H Club. It was held at the Youth Center with good times and good food for all.

A Valentine Dance also was held Friday night by Mrs. Bradley's Girl Scouts and their guests which included the Junior Pilgrim Fellowship. The Woman's Club, where it was held, was gaily decorated with red and white hearts, red and white streamers, and bright red Cupids.

The Jr. Pilgrim Fellowship elected officers for the coming year Sunday night. President is Charles Butler; vice-president, Ray Partridge; secretary, Janie Woodall; treasurer, Karen Jordan; and sergeant-at-arms, Grant Cooke. Dr. Roger Larson reports there are 14 members in the fellowship now. In

order to become a member you must be in the 7th or 8th grade and must attend three out of four meetings. The group meets at 6 p.m. Sunday evenings at the Alpine Community Church.

The fellowship is planning a progressive dinner for March 13.

The Sweetheart Ball Saturday night was as pretty as a Valentine. A few of the teenagers seen at the dance were: Mary Hittle, Charlotte Hittle, Kathy Hittle, Mary Ageno, Leona Songer, Murray Foster, Larry Chynoweth, Dennis Chynoweth, Janet Mosier, Terry Buchmiller, Dale Smith, Steve Greel, Linda McCarty, and Mike Matthews.

### Ear Muffs, Plugs

British Overseas Airways Corp. is using an old-fashioned approach to a jet age problem.

It has issued earmuffs to members of its London Airport staff and ear plugs to men working near jet engines.
